Actor:	Student
Description:	A student views courses to decide which they will take
Preconditions:	<ol style="list-style-type: none"> 1. The student has a valid account on the system 2. The student has a computer with the system user interface installed 3. The student has an internet connection 4. The server portion of the system is active and has an internet connection
Postconditions:	<ol style="list-style-type: none"> 1. The student has logged off the system
Priority:	Second priority
Frequency of Use:	At least twice per year
Normal Course of Events:	<ol style="list-style-type: none"> 1. The student starts the system user interface on their computer 2. Once the system has connected to the server, the student logs in with their account credentials 3. The student selects search criteria for the classes they wish to view via the appropriate user interface elements 4. When the student requests it, the system displays the search results from the server's database 5. Once the student is done viewing courses, they log off and close the system user interface
Alternative Courses:	None
Exceptions:	<p>1.1.EX.1: The user requests a search which has no results Response: The system informs the user their query has no results, and inquires as to whether they wish for another search</p> <p>1.1.EX.2: Loss of contact with server Response: The system user interface indicates a lack of connection to the student, and if a search query was interrupted the system stores the query to submit again once connection is reestablished with the server</p> <p>1.1.EX.3: Incorrect login credentials</p>

	Response: The system informs the student their login credentials are incorrect, and prompts for reentry
Includes:	
Special Requirements:	User interface should be satisfactory for users
Assumptions:	None
Notes and Issues:	None
